MEMORANDUM FOR Deputy Commanding General, US Army Installation
Management Command, 2511 Jefferson Davis Highway, Arlington, VA 22202-3926

SUBJECT: Request for Director of Information Management (DOIM) Support to Air
Force Weather (AFW) Joint Environmental Toolkit (JET) Fielding

1. Reference memorandum, HQ USAF, A3O-W, 23 Jul 08, subject: Joint Environmental Toolkit (JET) Server Hosting Maintenance Request.
2. Request IMCOM provide local DOIM assistance for JET fielding. IMCOMs active participation is necessary for the USAF to continue providing timely weather support to the Army.
3. The Air Force's JET program site survey teams are visiting Army installations to facilitate installation and develop site specific Project Support Agreements (PSA). The AF will begin fielding JET to replace legacy weather hardware on Army installations in the very near future. JET fielding includes the New Dissemination System (NDS) which will permit JET to securely transfer files across the Defense Information System Network (DISN) backbone. The successful fielding of JET is critical to weather support provided to Army installations and safety of Army airfields and aviation operations.
4. Request IMCOM DOIM personnel actively participate in JET PSA development in order to accurately determine the costs associated with this fielding. The PSA is crucial to assessing the suitability of existing infrastructure and possible impediments to successful fielding of JET as well as identifying costs the Air Force is responsible to bear.
5. Point of contact is Mr. Douglas Edsall, (703) 806-4417, email douglas.edsall@conus.army.mil.
