## 2008 Federal Radionavigation Plan

The *Federal Radionavigation Plan* is the official source of radionavigation policy and planning for the Federal Government and is required by the National Defense Authorization Act for Fiscal Year 1998 (10 USC 2281(c)). It is prepared jointly by the Departments of Defense (DOD), Homeland Security (DHS), and Transportation (DOT) with the assistance of other government agencies. This edition of the Federal Radionavigation Plan combines the Federal Radionavigation Systems (FRS) document and Federal Radionavigation Plan (FRP) into one document. The 2008 edition updates and replaces the 2001 Federal Radionavigation Systems document and the 2005 Federal Radionavigation Plan. It also covers common-use radionavigation systems (i.e., systems used by both civil and military sectors). Systems used exclusively by the military are covered in the Chairman, Joint Chiefs of Staff Master Positioning, Navigation, and Timing Plan.

The Federal Radionavigation Plan includes the introduction, policies, radionavigation system user requirements, system descriptions, and operating plans and will allow more efficient and responsive updates of policy and planning information.

The Federal Radionavigation Plan is updated biennially. Your suggestions for the improvement of future editions are welcomed.
